Jasleen Kaur Arora . Jarvis Consulting

I am a highly skilled Business Technical Analyst with 2 years of experience at Deloitte, where I excelled in bridging the gap between business requirements and technical solutions. My academic background includes a Bachelor's degree in Computer Science and a Postgraduate degree in Information Systems Business Analysis and Health Informatics. I am passionate about the role of a Business Systems Analyst because it allows me to utilize my expertise in data analysis, process optimization, and systems integration to drive business success. I am seeking a position where I can apply my analytical skills, technical proficiency, and strong communication abilities to deliver impactful business solutions. My proven track record in improving business processes and my dedication to continuous learning make me an ideal candidate for this role.

Linux Cluster Resource Monitoring App [GitHub]: Helped develop a user-friendly solution to manage a 10-server cluster. Responsibilities included recording the hardware specifications of each node and monitoring real-time resource usage. It was achieved using bash scripts for data collection, PostgreSQL for data storage, Docker for consistent execution and compatibility, and Git for version control. The collected data facilitated the generation of reports to support future resource planning, such as adding or removing servers. This project honed my skills in system administration, scripting, and database management, ensuring efficient cluster performance and scalability.
